

JUNIOR

JAVA DEVELOPER (M/F)

O2XP is looking for new colleagues for its teams of motivated and innovative Engineers.

You are autonomous, creative and productive. You communicate in English (French or German an asset). You love what you do and you share ideas with your colleagues. You are at the right place!

Typical Tasks / Responsibilities

- Analyze, design, develop, test and maintain IT applications;
- Produce technical and functional specifications of existing and/or new applications/services;
- Interact/cooperate with teams across multiple locations (functional, development and testing teams);

Required skills

- Good technical expertise in Java 8, JEE (JPA, REST, EJB, ...), Spring, Spring Boot, SQL and Linux;
- Capacity to quickly understand and enhance existing applications;
- Good understanding of Messaging (JMS, OAQ, AMQ, ...) and Service Oriented Architecture (SOA) concepts;
- Ability to work in a team distributed across multiple locations;

Nice to have

- Information technology in the banking and insurance domains;
- Enterprise Service Bus; Apache Camel;
- Layered service architecture;
- Experience in UML-based analysis techniques (Enterprise Architect);
- Multi-team Agile development environments;
- Unit tests, technical integration tests, Test-Driven Development;
- Configuration management, source control (GIT);

WHAT WE OFFER

SERVICES & EXPERTISE

We offer you expertise in **Open Source** frameworks, tools and librairies. O2XP is **oxygen** for your **business**. What about your next step?

Api? Api Gateway? Micro-services? Serverless development? Java? C#/.Net? Angular? React? UX (User Experiences)? Let's get in touch. We have a solution for you.

You need to integrate your existing solutions? You need to communicate with other data providers? We have lots of expertise in these fields using Open Source tools and libraries.

Our daily work in on the field. We are using the customer tools and procedures. We can help you to improve the processes (CI/CD).

So much to say there. From Lambda development to Ansible deployment and the use of Kubernetes (+ Docker) passing by Kong Api Gateway or AWS Api Gateway.

OUR MINDSET

Young company, mix of youth and experiences, flat structure, tribe spirit where colleagues are human being.

We are a Day 1 Company. Every day is a new day where experimenting, inventing and innovating is the norm. We help our customers through innovation.

We have a 'learn it all' culture where we practice the 4C leadership (creating, collaborating, changing and challenging).

We embrace intelligent failure where 'fail fast, fail cheap and move on' is a good rule for us and for our customers.

We trust our colleagues. We built the future with young and experienced people. Our customers embrace our dynamism, culture of innovation and share our successes.
